

Predator v. Prey

The object of the game is to study predator prey interactions by playing a game that requires students to collect resources (whether it be pasta or prey)

Each team of predators and prey must strategize for one minute before each round of resource collection.

Each round of resource collection will last 90 seconds.

When “ten seconds” is called out, the prey have ten seconds to reach their prey zone safely or they are considered captured.

Predators

the job of the predator in the game is to keep the prey from reaching their safe zones by removing their flags. Predators collect flags as an indication of their resource collection.

Rules

- 1. Predators must return to their predation zone if all prey are within safe zones
- 2. Predators must behave respectfully when removing the flags of prey (no rough play or violence of any kind).

Prey

The job of the prey is to collect resources in a safe zone while avoiding the predators.

Rules:

1. Only four prey allowed in a safe zone at a time
2. Once the resources are collected in a given safe zone, prey will have to move to another safe zone
3. Prey will scoop the resources (spiral pasta) onto a plate in the safe zone. LEAVE THE PLATE AT THE SAFE ZONE, do not remove it.

Predator Zone

Prey Zone

Instructional Video

Disclaimer: The video will say only two prey in each safe zone. For this class, the rules are there are four prey allowed in each safe zone
