

Enzyme Notes

1. What is a catalyst?
2. What is a biological catalyst?
3. What type of organic molecule is an enzyme?
4. What is activation energy?
5. Draw and label a graph showing the activation energy of sucrose decomposing into fructose and glucose. Add the enzyme sucrase showing the change in activation energy.

Enzyme Action!

6. Label and describe the enzyme activity below

7. What are factors that affect enzyme activity?
